

TRANSPARENT
PLEXIGLASS DOOR

**Cabinet for storing mobile phones.
A safe and practical solutions for schools,
offices and institutions.**

The compact mobile phone storage locker combines functionality and aesthetics

Ideal for any place where peace, concentration and organization are important.

More and more schools are choosing solutions that help reduce phone use during lessons - our cabinet is a practical way to maintain order focus in the classroom.

Main features:

Equipped with a cylinder lock - ensures complete security for stored devices.

- Transparent plexiglass door in a steel frame - lightweight, shatterproof, and extremely durable and secure.
- Three rows of special foam pads - made of soft, safe material that does not scratch the surface of phones.
- Foam pads for self-assembly - easy to stick on the shelves, allowing for flexible adjustment of the interior of the cabinet to current needs.

This solution means that with fewer students, the lower part of the cabinet can be used for storing items like keys or smartwatches.

Functionality and organization:

After attaching the foam pads, there is space at the front of the shelves that can be freely marked with numbers. This is a practical solution that can improve daily organization by facilitating identification and the quick process of issuing telephones according to the adopted numbering system, e.g. in the order of the logbook.

Safety and reliability:

- Despite its low weight, the cabinet has a stable and durable construction.
- It can be mounted on a wall or placed stably on the floor, depending on your needs.
- The use of plexiglass instead of glass guarantees safety and durability even in intensive school conditions.

- **MODERN DESIGN AND WELL-THOUGHT-OUT CONSTRUCTION.**
- **COMPLIANCE WITH REQUIREMENT TO LIMIT THE USE OF MOBILE PHONES DURING CLASSES.**
- **POSSIBILITY OF NUMBERING FOR BETTER ORGANIZATION.**
- **SAFE STORAGE PHONES, KEYS AND SMALL ITEMS.**
- **STABLE, LIGHTWEIGHT AND SOLID CONSTRUCTION.**

Article no.	05505
